

LIFE IN FREIBURG

Freiburg

Your place to grow

Freiburg is a traditional university town with a total population of about 240,000. Its international atmosphere and attractive location at the heart of Europe (bordering France and Switzerland) make it a very popular city among students. It is located at the foot of the Black Forest and surrounded by picturesque landscape.

MASTER OF SCIENCE

Economics

THE PROGRAM

Advanced Economics

The M.Sc. Economics at the University of Freiburg is a two-year, research-oriented graduate program in economics, which combines advanced economic theory with quantitative methods, empirical analysis, and perspectives on current economic and social challenges.

Graduates are prepared for careers in research, public administration, consulting, finance, international organisations, and other fields where economic analysis plays a central role.

V

Master's Thesis

Exciting research opportunities with renowned faculty make the master's thesis a chance to explore your passions, tackle meaningful economic questions, and contribute fresh insights to the field.

YOUR SPECIALIZATION

Three Specialization Profiles

Economics and Politics

This profile explores how economic and political institutions shape modern and developing societies. By linking traditional economics with political and institutional perspectives, the program provides a deeper understanding of real-world economic outcomes and the tools to evaluate them critically.

Finance

This profile provides an in-depth understanding of modern financial markets and institutions. It covers key topics such as portfolio management, derivative pricing and financial risk management. The program combines economic theory with empirical analysis and is well suited to students with a strong quantitative background.

Digital Markets

This profile provides an in-depth understanding of the economics and technology of digital markets. It covers key topics such as digital platforms, information systems and data-driven decision-making, while also developing practical programming skills. The profile is well suited for students interested in the intersection of economics, data, and digital technologies.
